

City & Guilds 2392-10 Level 2 Certificate in Fundamental Inspection, Testing & Initial Verification

A short course aimed at newcomers to inspection and testing of electrical installations, who possibly require certification to demonstrate technical knowledge and practical ability for entry into a Part P competent person's scheme and also the logical route towards 2391-10.

City and Guilds Certification is achieved on successful completion of both the practical assessment and PC based examination.

The course is offered as follows:

A four day course for a student possessing a working knowledge of the wiring regulations, to the level of City and Guilds 2382.

To further support this course, we offer a 1 day practical workshop available to candidates who have completed the course and require further 'hands on' practical experience prior to their practical examination. Most students who take this option, elect to complete this the day before their practical assessment.

We strongly recommend City and Guilds 2382 is achieved prior to sitting this course, though this is NOT an entry requirement.

The PC based multiple choice examination has 50 questions, is 1 hour 40 mins long and is closed book, with instant result.

The practical assessment takes approximately 2 hours, this can, if available, be taken on the day following the written examination or at a later date at a time which is mutually convenient to both student and centre.

If you wish to take the practical assessment the same week you are strongly advised to inform us as soon as possible when booking the course.

The course costs include examination entry fees, a buffet lunch and refreshments throughout the day.

Recommended book list:

These are available to purchase at discounted rates from Technique Training.

BS 7671:2008 IEE 17th Edition Wiring Regulations

Inspection and Testing Guidance Note 3

Please note; both the above books can be loaned for the duration of the course.
