

## City & Guilds 2382-10 Level 3 Certificate in the Requirements for Electrical Installations - BS 7671:2008 - 17th Edition Wiring Regulations

A 3 day short course aimed at anyone involved in the design, construction and inspection and testing of electrical systems, also a nationally recognised 'must have' qualification for companies seeking to recruit electricians.

This course is intended to introduce the candidate to a working knowledge of the Wiring Regulations along with a brief overview of the Electricity at Work Regulations covering their statutory duties. Previous knowledge of the regulations is not assumed, however a fundamental knowledge of electrical principles is assumed.

We are extremely proud of the success rate of our students who took the 2381 course and can see no reason why this will not continue with the advent of 2382. We look forward to adding you to our list of successful candidates!

The examination is a 2 hour multiple choice, open book PC based examination with instant results

The course costs include examination entry fees, a buffet lunch and refreshments throughout the day.
