TOTAL ELECTRICAL COURSE - 30

TEC30

COURSE DESCRIPTION

Building on the foundation provided by the TEC 20 Course, this 6 week option prepares you to undertake extended domestic installation work and make movement towards working in commercial electrical installations, therefore widening your market. As with the TEC 20 Course there is a strong emphasis on providing as much practical training as possible.

After completing the course you can if you require sign up with our recognised electrical company and work alongside them, gaining valuable further experience on real jobs. (subject to availability)

This course is by far the most popular option for those joining the domestic / light commercial electrical installation industries, as well as those looking to renovate or maintain domestic properties.

6 Week Course Comprising of:

Attendance on the TEC 20 - 4 Week Course

Module F - Gas Boiler Electrical Control Systems

BS5266 Emergency/Escape Lighting

BS5839 Fire/Smoke Alarm Systems

City & Guilds 2391 - Inspection & Testing (practical requirements of 3 phase testing and form filling)

Questions and Answers, Tooling and Business Strategy (including taxation issues)

Although the course is best attended as a 6 week block there is provision for attendance to be split into a modular form. Potential delegates are encouraged to arrange a visit to the centre where they can view the facilities and discuss their training needs with a member of our experienced advisory team.

OUTCOME

In addition to the awards received during the TEC 20 and upon successful completion, candidates will be awarded with the following qualifications/cards:
